

My name is Marty Gifford and I have been a customer of Sonic.net now since approximately 09/2000.

At the time my ISP was AOL and as a web student at SRJC I found their technical support to be dismal. I needed quick access to a shell linux account and quick ftp access as well.

I dumped AOL and have been with Sonic.net ever since. Please just leave them alone and allow them to provide broadband without messing with their ability to provide competitive prices.

I personally also stopped doing business with SBC by cancelling my land line and switching to Broadlink wDSL with Sonic.net. The reason; I am sick and tired of SBC's skullduggary tactics and shipping jobs overseas.

I have a sprint PCS cell phone and wDSL until I see a pattern change with SBC's business tactics.

I prefer Sonic.net as my ISP!
